## **Cover Story**

Thanks to Greg Lane at Braintree for this weeks cover story; a stunning Casablanca kitchen with Manhattan tower and wall units, Astro Black Quartz worktops and Electrolux/AEG appliances.

When Mr and Mrs Harding approached Greg about designing a black kitchen, they did have some reservations about how dark the room would look and asked for his advice. Greg's solution was the introduction of Manhattan units to help brighten up the room a little. The cream really complements the black Casablanca and the plinth lighting really works well to create a sleek, modern look.

Greg also introduced an island unit, which was the real clincher for the couple as it allowed them to replace their existing table and further enhance the overall look of their beautiful new kitchen.

The couple were so pleased with their kitchen, they wrote to Greg...we think their letter speaks volumes about the level of service they received from Greg and the fitters:

Dear Greg,

*With regards to our recent kitchen re-design and fit, we would like to express to you and your team our delight with our new kitchen.*

*Obviously when you embark on a new kitchen there is some trepidation as to the extent of the upheaval that may occur. Our Kitchen took a total of 3 weeks to complete and from start to finish with Wickes it was 100% satisfactory.*

*We found your design service to be the best of the ones that we had considered, with more help and advice on offer than any other company. The kitchen fitter assigned to our job came round to introduce himself and double check measurements and extra work that we were having carried out; to actually run through everything with the guys that would be carrying out the work we found a great help.*

*Our kitchen was delivered, when said, by two men who took the time to check off the order and make sure everything was correct. Our two fitters were Darren Watts and James Robertson, they carried out our job from start to finish never failing to turn up and keeping us fully informed with the work in progress. They were both professional, extremely competent in every aspect of their work and a pleasure to have around. We would like to say a huge 'Thank You' to them both. Their standard of work is extremely high and we cannot fault them on any level.*

*When spending a considerable amount on a new kitchen, you would like to think that the cabinets, doors and appliances will be of a high standard. Again this was proved to be the case. Our new Kitchen looks and feels very high spec. But in all honesty Wickes was not the most expensive by a fair way compared to other similar kitchen suppliers and fitters. It would be true to say we are extremely pleased and proud of our new kitchen, it is totally transformed and we love it. It has turned out even better than we imagined from the design pictures.*

Once again a huge 'Thank You' to Wickes, Greg, Darren and James.

Yours

Kevin and Haley Harding
